EDUCATION

The University of Texas at San Antonio

Spring 2028

B.S. Computer Science and Minor in Film and Media Studies | GPA: > 3.5

Relevant Coursework: OOP, Data Structures, Applications Programming, Discrete Math, Programming in C, Computer Organization, Intro to Electrical/Computer Engineering

Additional Affiliations: ColorStack | Girls Who Code | Rewriting The Code | SA Film Festival Award Winner

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, HTML, CSS (Proficient) | SQL, C#, JavaScript (Familiar)

Tools & Technologies: Git/Github, MacOS, Linux, Eclipse, IntelliJ, VSCode, OnShape, Arduino.

Adobe Certified in Illustrator, Photoshop, Premiere Pro, Audition, and After Effects.

Fluent in Spanish with strong proficiency in speaking, reading, and writing.

PROFESSIONAL EXPERIENCE

LAIKA Studios | *Software Engineer Intern*

Jun - Aug 2026

- Utilized standard software engineering agile practices of rapidly prototyping projects, testing code, integrating with other systems, software architecture proposal and planning to build a dependency management solution used by all studio technology.
- Led the building and designing of tools used by the Unreal real-time pre-visualization pipeline team.

Walt Disney World Resort | *Cast Member*

Aug – Dec 2025

- Delivered exceptional guest service to 1600+ guests per day at Walt Disney World Resort's EPCOT, developing strong communication and problem-solving skills while maintaining 98% satisfaction rate.
- Completed Disney University's Leadership Excellence certification, implementing learned strategies to resolve guest conflicts and improve team collaboration.
- Conducted a requirements building exercise with the intention to enhance food & beverage operations, derived from 3 hours of interviews with 2 Epcot team leaders.

San Antonio Circuit Makers | *Volunteer Instructor*

March 2025 – present

- Instructed +30 students in Arduino programming and electronics, developing hands-on curriculum that increased STEM engagement by 54%.
- Led participants through the process of constructing a small PCB module using LED and light sensor components to increase interest in STEM and create a fun hands-on learning focused on design, circuitry, and soldering.

Association of Computing Machinery - Women's Chapter | *Member*

Aug 2023 – present

- UT-San Antonio Budget Allocation (Java, Github) - Developed Java-based budget allocation system for UT-San Antonio, processing +10 records of unstructured data and reducing manual processing time by 20%.
- Clue: Choose Your Own Adventure (Python) - Built Python-based interactive featuring randomized story generation with 17 unique endings & dynamic graphics, demonstrating proficiency in game logic and UI design.
- Overloaded Hospital Program (C++, Java) - a hospital patient management system in C++ and Java, implementing a priority queue algorithm to optimize patient sorting and reduce billing calculation time by 40%, handling patient records efficiently.
- JamMates (Android Studio – Java, Kotlin, Github) - Developed JamMates music recommendation app using Java and Kotlin, implementing mood-based algorithm to curate personalized playlists for +20 users

The Escape Game | *Game Guide*

May – Aug 2025

- Managed escape room experiences for over 150 guests monthly, maintaining a +98% satisfaction rate through clear rule explanations, strategic hint-giving, and efficient room resets.
- Trained and guided diverse teams while troubleshooting real-time guest issues, honing skills in clear communication and fast-paced problem-solving.
