EDUCATION

The University of Texas at Austin May 2028

- B.S in Arts and Entertainment Technologies and Certificate in Programming & Computation

The University of Texas at San Antonio | Attended Aug 2024 - May 2026

- B.S. in Computer Science and Minor in Film and Media Studies

TECHNICAL SKILLS

Programming Languages: Python, C#, Java, C, HTML/CSS (Proficient) | SQL, JavaScript (Familiar)
Tools & Technologies: Git/Github, MacOS, Windows, Linux, Jira, IntelliJ, VSCode, Miro, Arduino, Unity, Microsoft Office.
Adobe Certifications in Illustrator, Photoshop, Premiere Pro, Audition, and After Effects.
Fluent in Spanish with strong proficiency in speaking, reading, and writing.

PROFESSIONAL EXPERIENCE

LAIKA Studios | *Software Engineer Intern* | Hillsboro, OR Jun 2026 - Aug 2026

- Developed an end-to-end dependency management solution tool adopted across studio technology teams, utilizing Agile workflows to rapidly prototype, design system architecture, and integrate with existing systems.
- Engineered and deployed an automated Azure MP4 upload pipeline for 3 interactive Unity game exhibits to be featured at the Academy Museum of Motion Pictures in LA.

Walt Disney World Resort | *Cast Member* | Lake Buena Vista, FL Aug 2025 - Dec 2025

- Delivered exceptional guest service to 1600+ guests per day at Walt Disney World Resort's EPCOT, developing strong communication and problem-solving skills while maintaining 98% satisfaction rate.
- Completed Disney University's Leadership Excellence certification, implementing learned strategies to resolve guest conflicts and improve team collaboration.
- Conducted a requirements building exercise with the intention to enhance food & beverage operations, derived from 3 hours of interviews with 2 Epcot team leaders.

San Antonio Circuit Makers | *Volunteer Instructor* Apr 2025 - present

- Instructed +30 students in Arduino programming and electronics, developing hands-on curriculum that increased STEM engagement by 54%.
- Led participants through the process of constructing a small PCB module using LED and light sensor components to increase interest in STEM and create a fun hands-on learning focused on design, circuitry, and soldering.

Association of Computing Machinery - Women's Chapter | Member Aug 2023 – present

- UT-San Antonio Budget Allocation (Java, Github) - Developed Java-based budget allocation system for UT-San Antonio, processing +10 records of unstructured data and reducing manual processing time by 20%.
- Clue: Choose Your Own Adventure (Python) - Built Python-based interactive game featuring randomized story generation with 17 unique endings & dynamic graphics, demonstrating proficiency in game logic and UI design.
- Overloaded Hospital Program (C++, Java) - a hospital patient management system in C++ and Java, implementing a priority queue algorithm to optimize patient sorting and reduce billing calculation time by 40%, handling patient records efficiently.
- JamMates (Android Studio – Java, Kotlin, Github) - Managed a group of 4 to develop JamMates, a music recommendation app, implementing a mood-based algorithm to curate personalized playlists for +20 users.

The Escape Game | *Game Guide* | San Antonio, TX May 2025 - Aug 2025

- Managed escape room experiences for over 150 guests monthly, maintaining a +98% satisfaction rate through clear rule explanations, strategic hint-giving, and efficient room resets.
- Trained and guided diverse teams while troubleshooting real-time guest issues, honing skills in clear communication and fast-paced problem-solving.
